APPLICATION NUMBER : 11330196

APPLICANT : NEC SHIZUOKA LTD;

INVENTOR : OZAKI MASAYA;

INT.CL. : G06F 1/16 H04M 1/02

TITLE : CASING, METHOD FOR DESIGNING
CASING AND PORTABLE TERMINAL

ABSTRACT : PROBLEM TO BE SOLVED: To freely change design of colors, patterns, etc., on the surface of the casing and to allow the casing to correspond to the diversity of user's needs, by downloading display data for determining the design of colors and patterns on the surface of the casing to a storage part in the casing.

SOLUTION: An LCD 4 is attached to the surface of the casing. Plural display data read out from external information terminal equipment are previously stored in the casing side storage part 2. A CPU 6 reads out the data concerned from the display data stored in the storage part 2 by a user's instruction input and determines the colors or patterns of the LCD 4 or their combination to design the surface of the casing.
